CAREER OBJECTIVE

I am a motivated Computer Science student with hands-on experience in Java, passionate about applying AI, ML, and NLP techniques to solve real-world, data-driven problems and grow as a software professional. I am eager to continuously learn new technologies, enhance my problem-solving skills, and contribute effectively to innovative software solutions.

PROJECTS

CareerWave (AI-Powered Career Counseling Platform) (July 2025 - Present)
Developed an AI-based system to assess student profiles, predict suitable careers, and provide personalized recommendations using Machine Learning and Large Language Models (LLMs).
My Role: Designed and implemented the complete ML and AI pipeline, including data preprocessing (skills, interests), feature engineering, and career prediction using XGBoost and scikit-learn models. Integrated Groq LLM for natural language counseling and dynamic feedback. Built RESTful APIs (Flask) and a web interface for real-time analysis, interactive chat, and automated career guidance.

Predictive Transaction Intelligence System for BFSI (Sept 2025 - Nov 2025)
Developed a machine learning–based system to analyze financial transaction data, predict transaction risk levels, and support proactive fraud monitoring in BFSI applications.
My Role:Collaborated with teammates in designing and implementing the ML pipeline, focusing on transaction data processing and feature preparation. Contributed to data cleaning, handling missing values, and encoding categorical transaction attributes. Assisted in feature engineering of behavioral and temporal features and supported training a supervised XGBoost model for transaction risk prediction. Helped integrate the trained model into a web interface to enable real-time transaction risk analysis and decision support.

Resume Analyzer (Feb 2025 - Mar 2025)
Developed an AI-based system to automatically extract key skills, classify resumes into job categories, and provide feedback using Machine Learning and NLP techniques.
My Role: Designed and implemented the complete ML pipeline, including text preprocessing using TF-IDF Vectorizer, label encoding for category mapping, and a Logistic Regression model for classification. Integrated the trained model into a web interface for real-time resume analysis and automated career suggestions.

PROGRAMMING LANGUAGES

- Java
- Python(Basic)

DATABASE

- SQL

SKILLS

- Analytical thinking
- Adaptability
- Problem-solving
- Teamwork

TOOLS AND PLATFORMS

- Visual Studio Code

EDUCATION

10th - 81.60%
12th - 78.33%

BE CSE
CGPA - 8.12/10

LANGUAGES KNOWN

- English (Fluent)
- Tamil (Native)
- Urdu (Conversational)

CERTIFICATIONS

- PwC Salesforce Launchpad Certification (6 Months)
- NPTEL Programming in Java(12 week course)
- NPTEL Data Structures and Algorithms using Java (12 week course) ELITE
- Infosys Internship 6.0 Completion (15 Sept 2025 - 25 Nov 2025)
- Machine Learning Internship(Imarticus Learning) (25 Feb 2025 – 20 Mar 2025)
- Oracle Cloud Infrastructure 2023 Certified Foundations Associate (Valid until April 2026)
